Xcel Mentoring Network

Mission: Xcel Mentoring serves as a bridge to an education, hands-on career training, and a career for at risk youth in Palm Beach County. Xcel combines the power of transformative mentoring with the accessibility of a mobile training unit, to facilitate hands on learning, hard and soft skill development. **Xcel's Fueled with Purpose curriculum** is based on the Measuring and Assessing Soft Skills Project, and it is composed of life-skill character development training featuring six key areas: goal setting, time management, health & fitness, financial stewardship, relationships, and relational intelligence. Xcel's innovative Mobile Training Units allow hands on access to tools, materials, and the experiential learning that has led to higher success rates and has increased the likelihood that Xcel participants have the hard and soft skills credentials that employers are looking for.

Project: A grant would allow us to hold monthly trainings with adequate supplies and generator use in the Mobile Training Units.

In addition to the Life Skills training and mentoring, including hands-on training in the trades using our Mobile Training Units.
